A WARMER, MORE SECURE AND ATTRACTIVE HOME.

If you're looking for a window system that will transform your home with more light, better security, enhanced aesthetics or improved energy efficiency, you'll find your perfect match in the Lifestyle Range.

The collection includes different styles of windows designed to fit your home, your aspirations and the way you wish to live, ranging from Casement and Bay or Bow styles to Tilt & Turn and Fully Reversible options.

Crafted from technologically advanced, modern materials, our collection of uPVC windows are produced by the VEKA UK Group under the Halo brand. Having led the way in the design and manufacture of windows and doors for more than 30 years this is now one of the most specified uPVC systems in the world.

A refined collection of high-quality, low-maintenance windows to add a touch of class to your home.

Curvaceous & CONTEMPORARY

Sculptured
frame

CHOOSE THE FRAME THAT'S RIGHT FOR YOU

The Lifestyle Range of HALO windows is available in a choice of bevelled or sculptured profiles.

Bevelled profiles offer a more contemporary look with angular, clean lines while the HALO sculptured frame option is softer, rounded and more ornate.

Both profiles offer different aesthetics but the same superb security features, energy efficiency and range of finishes and colours.

Bevelled
profile

Enjoy the benefits...

Our Lifestyle Range offers the perfect balance of aesthetically-pleasing frames with the modern benefits you'd expect from uPVC. Designed to keep you safe and warm, you can find your perfect finish thanks to the huge range of colours available.

Virtually-maintenance free, our windows don't require time-consuming sanding or painting, which means you can spend more time doing the things you love.

The multi-chambered construction of our windows gives added strength and improved thermal efficiency.

Fully-integrated, slimline weather sealing maximises glazed area while eliminating draughts for a warmer home.

LIFESTYLE
RANGE

THE PERFECT FINISHING TOUCHES TO YOUR WINDOWS

By simply adding astragal bars and run-through horns you can transform a standard casement window to give it an authentic period look.

Astragal bars

Run-through horn

Internally glazed to prevent the glazing bead from being removed outside – offering greater security.

70mm profile, designed to replace existing frames for minimal trimming or finishing during installation.

A more energy efficient home - our windows achieve up to A++ WER (Window Energy Rating).

CASEMENT WINDOWS

Add a classic touch...

White astragal bar window.

With their radiant looks, versatility and impressive thermal and security performance, it's easy to see why casement windows are the go-to style for British homeowners.

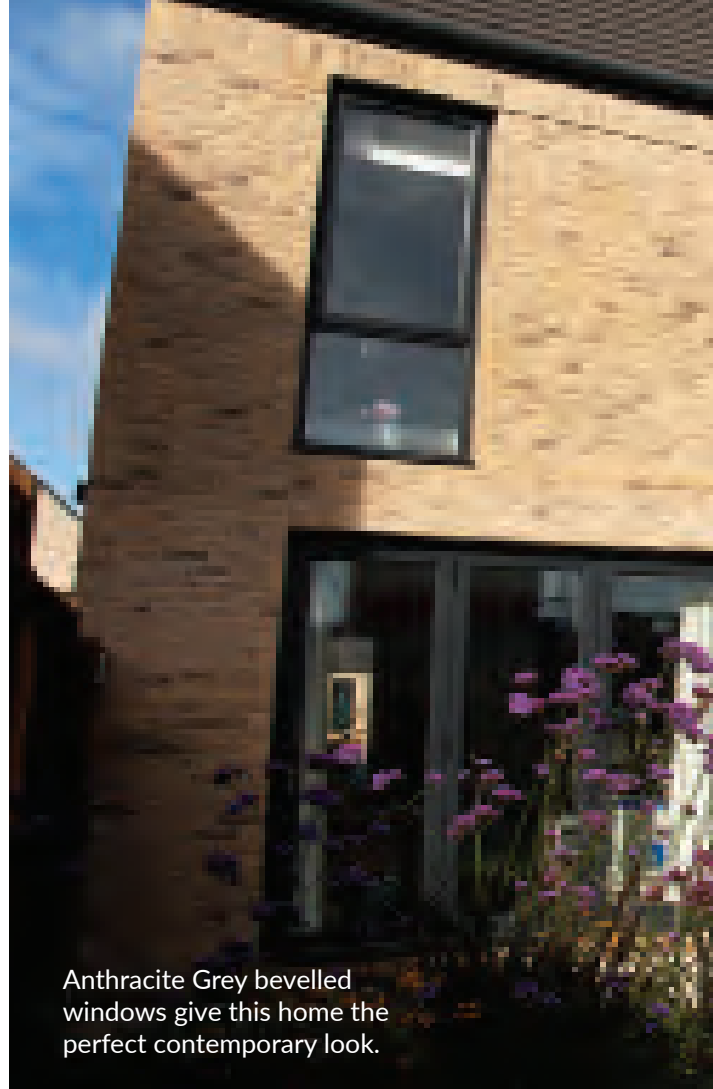

Hinged at the top or side, casement windows add light and brightness to every kind of home, from contemporary builds to older houses. It's the versatility of casement windows which makes them so popular as there is a number of combinations of fixed and opening frames available. Simply choose what best suits you, how you use your rooms and the style of your house.

Casement windows are also available in a French style. This option is often favoured by building control when fire escape is a concern.

FRENCH WINDOWS OPTION

As with French doors, the vertical centre piece of the window is not fixed and fully opens up for uninterrupted views.

Anthracite Grey bevelled windows give this home the perfect contemporary look.

Sculptured White profile windows are still a firm favourite for updating UK homes.

Though UK households generally favour outward-opening casement windows, you can specify inward-opening styles if you'd prefer – the choice is yours.

Outward opening, side-hung sculptured profile window with Agate Grey on the outside and White on the inside.

BAYS AND BOWS

White bow window with Bright Chrome finish handles

DISTINCTIVE AND *beautiful*

Bays and Bows add a prestigious touch to any home.

While bay windows allow for a larger internal space, bow windows can certainly create the illusion. Both styles allow natural light to flood in making the room feel brighter and more spacious.

Bay windows give a classic appearance and create greater space, looking elegant inside and out. With numerous opening casement window options, ventilation can be easily controlled by opening them individually.

As it extends outwards, the bow window gives the illusion of space and can completely transform the look of your property. Bow windows can also be tailored to suit your needs, giving you the option to choose which panes should remain fixed, and which can allow for opening.

A modern look for this home with Anthracite casements and a bay window.

Sculptured profile bow window with decoratively glazed top lights.

TILT AND TURN

Tilt and Turn windows strike the perfect balance between good ventilation and easy cleaning.

A safe, secure and stylish option for any type of home, these windows open in two ways. One turn of the handle allows you to tilt the window inwards from the top to let the fresh air in, while the effortless rotation mechanism gives you the option to open the window fully for more air, or to easily clean the panes, inside and out.

Sleek and contemporary aesthetics are combined with weather resistance and a high security specification. For homeowners looking for extra safety features, these windows can be fitted as Tilt- or Turn-only if required on installation.

With one handle for locking, opening and tilting, it is simple and easy to operate. Our Tilt and Turn windows are available in a choice of bevelled or sculptured systems and a number of glazing options and foiled colours. Available in locking and non locking for added safety.

FULLY REVERSIBLE WINDOWS

INSIDE OUT *outside in...*

Fully Reversible windows are among the latest in uPVC product innovation, designed specifically for high rise living or hard-to-reach areas of the home where windows cannot be cleaned externally.

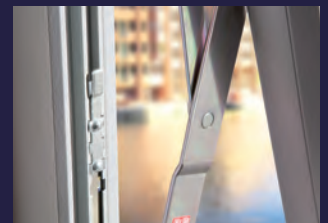

The 180 degree reversible function means the outside pane can be easily accessed for cleaning, simply by turning it from the inside. Better still, it operates without even entering the home so you can clean without fuss and you

won't have to remove any ornaments or picture frames from your window cill.

Simple to operate and aesthetically-pleasing, it also provides a range of ventilation options. For added safety, fully reversible windows have flexible locking positions and optional restrictors.

This window is a VEKA group product, ancillaries may not be a direct match to the profile shape.

Fully reversible windows have an opening restrictor option as a safeguard.

TRIPLE GLAZING

EVEN WARMER ON THE INSIDE WHEN IT'S COLD ON THE OUTSIDE

The option to specify triple glazed units offers you even greater energy efficiency and can help save you money on your heating bills.

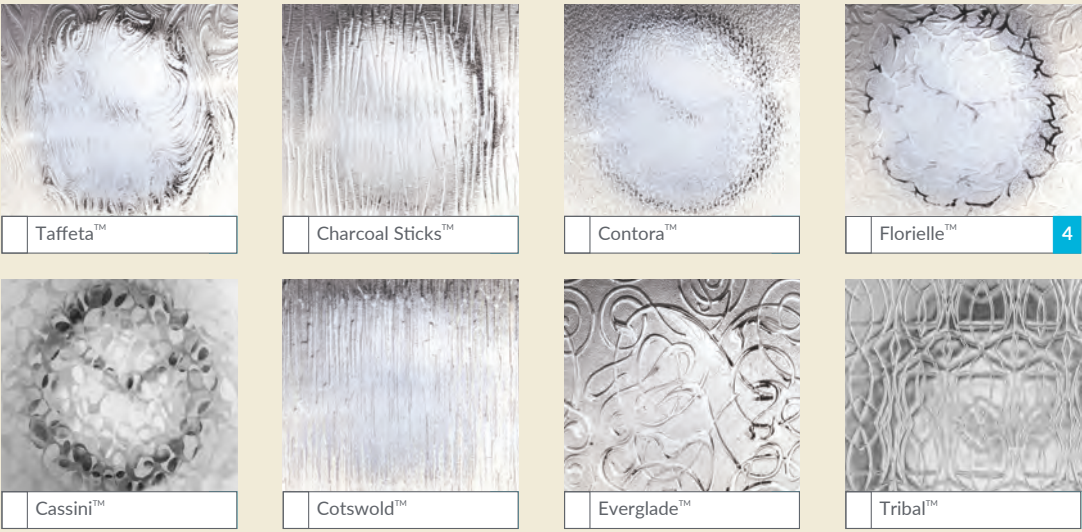

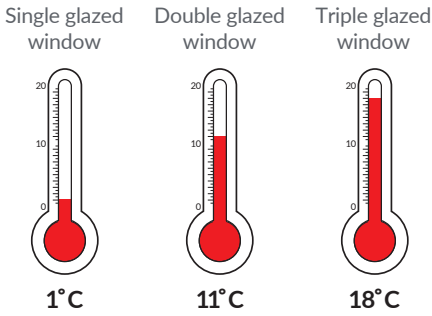

BEFORE and AFTER: The above thermal images clearly demonstrate the advantages of installing new energy efficient windows. The heat loss temperature of the living room window is 1.3°C before and -4.5°C after the new windows were fitted - a significant reduction.

TRIPLE GLAZING AND THERMAL EFFICIENCY UPGRADE OPTIONS

- 3 panes of glass
- Argon gas filled units *
- Heat reflective glass *
- Warm edge spacer bars *

* Also available on double glazing.

HARDWARE AND FITTINGS

THE *perfect* COMPLEMENT

Your windows are only as good as the hardware and fittings supplied with them, which is why we only work with leading suppliers, to guarantee a long lasting product that performs while looking great throughout its lifetime.

Operated by an easy push-to-open button, our handles are as durable as they are appealing in nine great colour options.

For Tilt & Turn-style casement windows installed above ground level, the handle has been designed to restrict full opening without a key for additional safety.

SAFE AND SECURE

HIGH SECURITY

21st century living requires reassuring security features. Our windows feature one of the most advanced shootbolt locking mechanisms on the market today. Built to exceed stringent PAS24 requirements. With a range of 4-6 locking points and a night-vent position to secure your home against forced entry.

ADDITIONAL SECURITY

Hinge Protectors provide extra security, and if forced, the hinges have more protection. The shootbolt is complemented with bi-parting mushroom cams which lock the centre of the window, and resist attempts to jemmy it open.

MULTI-POINT PROTECTION

Multi-point protection secures the windows firmly in their frames with the option to upgrade the locking system to meet Secured by Design standards if required.

This colour panel is printed as a close match to the frame colour option of: **Silver Grey**.

COMPLETE PEACE OF MIND

For enhanced security and extra peace of mind, the coveted and police-led Secured by Design standard can be easily achieved across the entire casement range with a few minor upgrades.

Simply ask for Secured by Design Specification on your order and we will make the changes.

Our products are manufactured under licence by Glazerite UK Group Ltd.

...AND DON'T FORGET THE DOORS

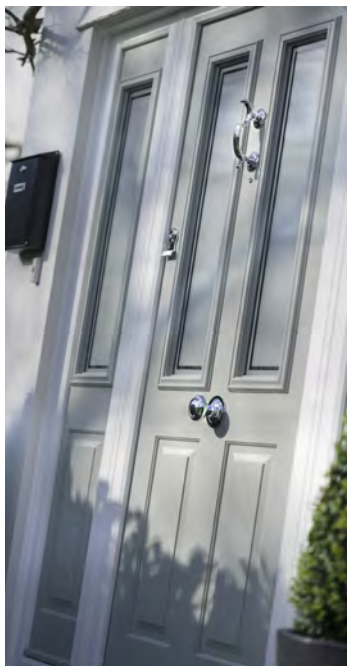

Bi-Folding doors

DISTINCTIVE AND DURABLE

The Lifestyle Range of doors includes composite door styles from leading brands. There is also a range of patio, French, residential and bi-folding doors to complement your chosen window system, in a wide variety of colours. From traditional character to contemporary beauty, you can find the perfect door for your home, combined with the thermally efficient, high security, weather resistant and low maintenance benefits uPVC is renowned for.
